

FORD BRONCO XLT

BRONCO XLT

Ford Bronco XLT. For the land you know.

Ford Bronco XLT is more than just a capable 4WD. It's the practical choice for those who drive a mix of off-road and on-road kilometres. Bronco offers effortless highway cruising comfort and handles off-road conditions with ease.

Bronco is an outstanding vehicle for towing, able to handle vans, boats and floats. And, for even greater towing capability, there is the option of V8 power, at extra cost. Power

steering is standard and makes the driver's job less arduous.

To drive Bronco is to enjoy the feeling of control which its high, commanding driving position provides. Its narrow pillar design, large glass areas and large exterior side mirrors provide for excellent all-round vision, in traffic or off-road.

With its rugged stand up styling, Bronco XLT presents a handsome exterior to the world. The styling is

high, wide and handsome, with a full-width grille containing squared-up headlights and indicator lights.

You can express your individuality with a choice of two different two-tone paint styles which are optional at extra cost.

With its exciting combination of luxurious interior appointments, excellent drivability and four-wheel drive capability, Ford Bronco XLT is made for the land you know, and the country you don't.

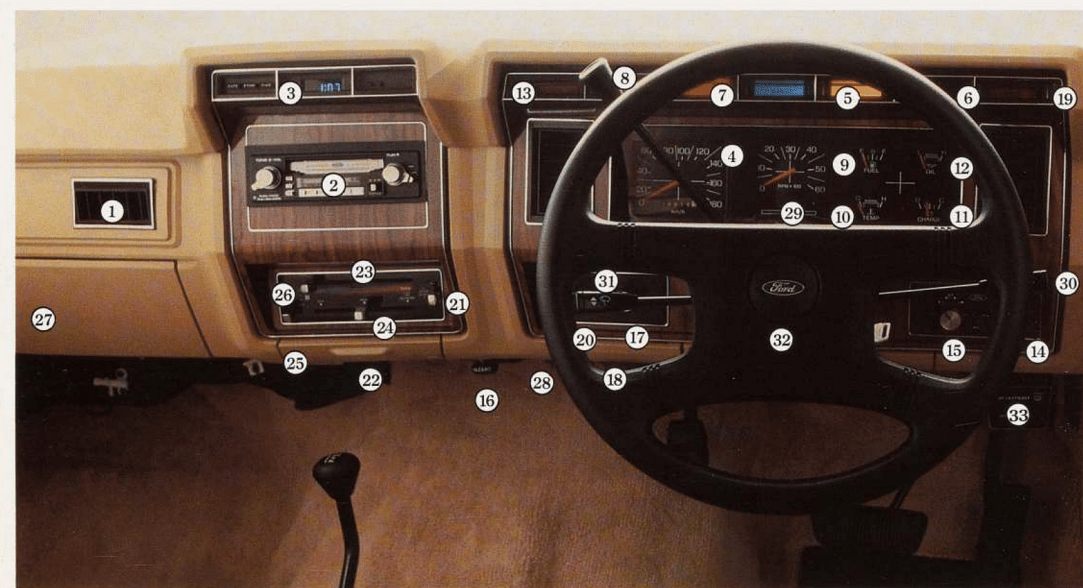

Station Wagon Style with Luxury and Space.

Compare Bronco's interior with other 4WDs. Bronco XLT invites you into a world of luxurious appointments and stretch-out space for five adults, plus a generous cargo/luggage area.

Twin bucket seats up front provide a commanding view. And the wide flip-fold rear seat provides spacious comfort with generous shoulder-room. With the rear seat folded down there is a huge cargo area with the potential to ferry a tonne of gear to most places you can think of - on or off the road. A rear-mounted swing-away spare wheel carrier is available at extra cost and provides for ease of access and

The Bronco XLT depicted here and on the front cover is fitted with the following options: two-tone paint treatment, 10 x 15 radial tyres and swing-away spare wheel carrier.

1. Air conditioner vent.
2. Push button AM/FM stereo cassette.
3. Digital clock.
4. Speedometer/Odometer.
5. Turn signal indicators.
6. Brake warning light.
7. High beam light.
8. Park brake light.
9. Fuel gauge.
10. Temperature gauge.
11. Battery charge gauge.
12. Oil pressure gauge.
13. 4WD indicator light.
14. Air-conditioner temperature control.
15. Air-conditioner fan control.
16. Hazard flasher switch.
17. Choke control (standard on 6 cylinder) or hand throttle control (on V8).
18. Park brake.
19. Alternator warning light.
20. Head lamp switch.
21. Power tailgate switch.
22. Ash tray.
23. Heater temperature lever.

24. Heater mode lever.
25. Cigarette lighter.
26. Heater fan switch.
27. Glovebox.
28. Hand throttle on 6 cylinder.
29. Tachometer. Dash in Desert Tan vinyl with instrument clusters on woodgrain-styled applique.
30. Right hand stalk: turn signal/horn/high and low beam functions.
31. Left hand stalk: washer/wiper functions.
32. 'Soft-feel' 4-spoke steering wheel.
33. Heated rear window switch.

ensures that the load area is uncluttered – also adding a decidedly ‘off-road’ note to the rear view of Bronco.

Bronco's long list of appointments and convenience features includes plush carpeting from wall to wall. Push button AM/FM stereo cassette. Digital clock. Cloth seat facings. Comprehensive instrumentation in two ‘no-glare’ clusters with wood-grain style applique surrounds. Instrumentation includes tachometer and an array of dials and warning lights to monitor important engine functions. Controls are grouped in front of the driver for ease of operation.

For your further comfort, factory fitted air-conditioning is available at additional cost.

In standard form, fitted with four-speed manual transmission, the gear shift lever is floor mounted, beside the transfer case shift lever (4WD). Where optional automatic transmission is specified at extra cost with the V8 engine, the gear selector is column mounted.

Interior storage is another feature of Bronco. In addition to a lockable glovebox, there are roomy stowage bins on the inside of each door, and a jumbo-sized centre console which is also lockable and has a drink tray formed in the top.

And the country you don't.

Compare the powerful Alloy Head II six-cylinder engine of Bronco with the power ratings offered by other 4WDs. And then, consider Bronco's massive transfer case reduction ratios plus front and rear limited-slip differentials. These are the ingredients which provide exceptional off-road performance.

But it doesn't stop there.

Bronco is manoeuvrable, sitting on a short wheelbase of 2660mm, and with the advantage of short body overhangs, front and rear.

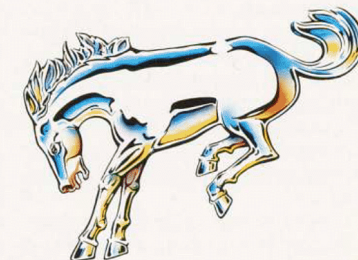

Not only is Bronco able to negotiate steep slopes, but the stability provided by its wide track allows many slopes

to be traversed – when the situation demands.

Excellent ground clearance is maintained over bumps and pot holes with Bronco's twin traction, independent front suspension which permits each wheel to move up and down separately. Pitch and roll are minimised while steering control and traction are enhanced. Bronco is built tough to take the rough in its stride – with a full truck-type chassis for strength and durability.

Whether you're panning for gold... hiking off the beaten track... or planning a shooting, fishing or photographic safari... look no further than Ford Bronco XLT. It has the

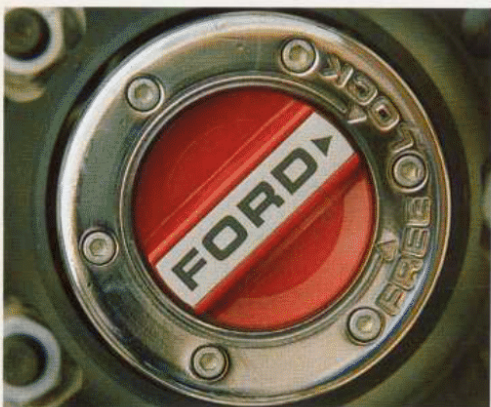

ability to transport you and your family or friends far from the beaten track.

Like its namesake, the wild horse, Bronco handles the open country, rocky creek crossings and steep slopes with confidence.

Free-wheeling front hubs.

As Bronco gives you a choice of 2WD or 4WD, free-wheeling front hubs are standard. In 'free', the front wheels rotate freely on the axles, reducing unnecessary fuel-wasting drag on the engine. When switched to 'lock', the front wheels are locked to the driving axles for 4WD performance.

True 4x4 power.

Because you don't need 4WD all the time, Bronco has a 'by your command' system. When the transfer case is in 2H, normal rear wheel drive operates. Now move the lever to 4H and you've got easy-going four-wheel-driving. But when the going gets tough, drop it down to 4L, select first

or second gear and you've got the power to plough through deep slush or climb steep inclines.

Choice of transmissions.

In standard form, Bronco is equipped with a manual four-on-the-floor transmission. Automatic transmission is available at extra cost with the V8 engine.

Bronco is equipped with Limited Slip Differentials (LSD) front and rear. They limit the amount of slippage so that in 4WD power is transmitted to all four driving wheels, no matter how difficult the terrain. If four wheel drive is not engaged, the LSD at the rear will provide optimal 2WD traction.

Choice of Powerplants.

The standard Bronco fitting is the powerful 4.1 litre 6-cylinder Alloy Head II engine featuring a two-stage carburettor and other engineering refinements which, together with electronic ignition, provides real four-wheel-drive muscle with excellent 6-cylinder economy.

The renowned Ford 5.8 litre V8 engine is optional at extra cost and is recommended where arduous off-road work or large towing jobs demand big horsepower.

Bronco powertrain system with transfer case and drive shaft to the front axle for 4WD.

Ford 4WD independent front suspension showing how each wheel operates independently of the other providing a controlled ride.

Steel skid plate protection.

Both the front differential and 121 litre fuel tank have steel skid plates to protect them in rough off-road conditions.
